MailSort, WalkSort & CleanMail On Demand

If your organisation sends more than 1000 items of UK mail in a single run, you can take advantage of the significant postage savings the Royal Mail's MailSort, WalkSort and CleanMail bulk mail discount services provide.

MailSort, WalkSort and CleanMail Savings

50,000 Items of 2nd Class Mail (@ £0.21). Standard Cost = £10,500.00

MailSort 120 (OCR) Cost £8,316.00 Saving £2,184.00	MailSort 120 (CBC) Cost £8,211.00 Saving £2,289.00	MailSort 700 Cost £8,001.00 Saving £2,499.00	MailSort 1400 Cost £9,135.00 Saving £1,365.00	WalkSort Cost £6,930.00 Saving £3,570.00
CleanMail (OCR) Cost £10,006.50 Saving £493.50	CleanMail (CBC) Cost £9,754.50 Saving £745.50	CleanMail Plus (OCR) Cost £9,660.00 Saving £840.00	CleanMail Plus (CBC) Cost £9,450.00 Saving £1,050.00	

DESPITE the considerable postage savings MailSort, WalkSort and CleanMail offer, many organisations such as yours, have discovered that the software required to process their correspondence to the Royal Mail's exacting standards is too difficult to install and maintain or is incompatible with their existing system or data.

To resolve this, FunAsset offers three Microsoft Windows applications called MailSort On Demand, WalkSort On Demand and CleanMail On Demand. Each enables your organisation to take advantage of the savings provided by the MailSort 120 (OCR & CBC), 700, 1400, WalkSort, CleanMail (OCR & CBC) and CleanMail Plus (OCR & CBC) bulk mail discount services in the simplest way possible, using almost any system and data as a correspondence source.

How the Applications Work

MailSort, WalkSort and CleanMail On Demand work by receiving print data from your mainframe, server or PC and identifying, sorting and outputting the items of correspondence in a way that is accepted and certified by the Royal Mail.

Distinct Advantages

- A sophisticated method of extracting addresses from your data stream means there is no need for you to make changes to your existing system or use a separate database of addresses (a process used by most other applications).
- Comprehensive error reports are generated for use with your Royal Mail audit and to enable you to easily rectify inaccurate addresses directly at source with the minimal amount of disruption.
- Automatic or manual selection of the most suitable discount service for your requirements.

Stand-alone or SpoolQ Integration

MailSort, WalkSort and CleanMail On Demand have been designed as either stand-alone applications or add-ons to FunAsset's SpoolQ software. Using them in conjunction with SpoolQ provides you with enhanced correspondence management and allows you to route different batches of mail to different printers - significantly reducing the time it takes for large volumes of correspondence to reach the mailroom.

Royal Mail Certification

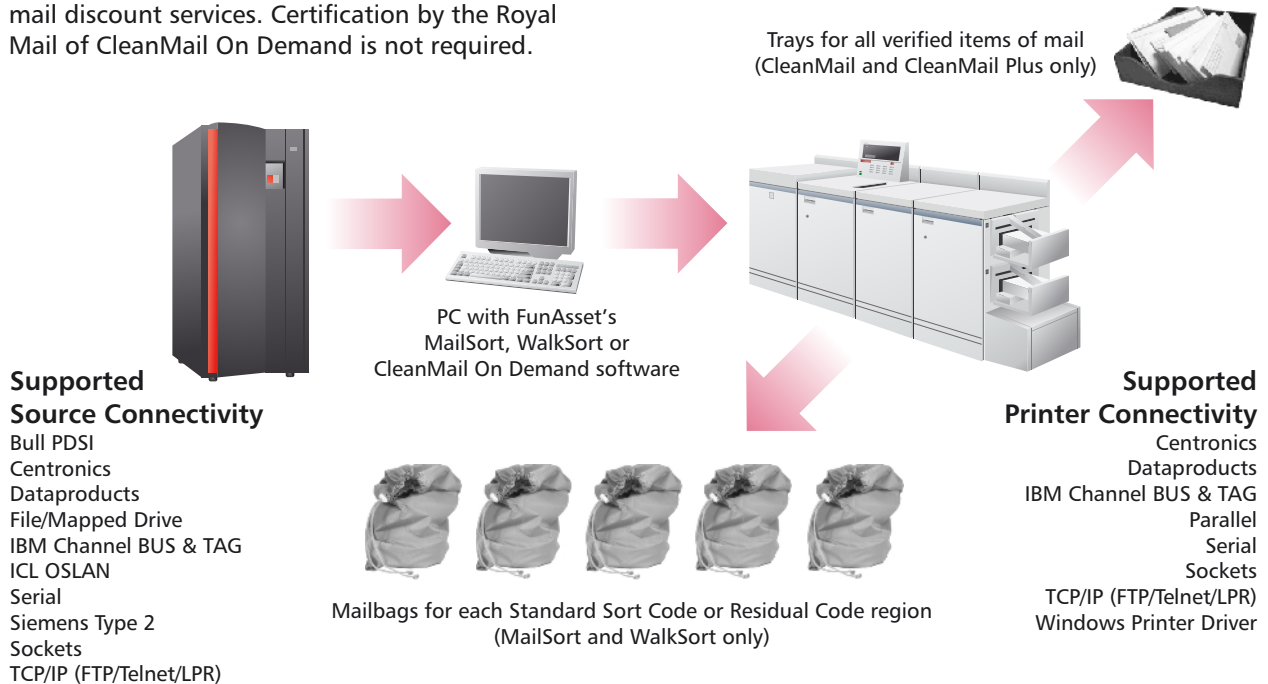

MailSort and WalkSort On Demand have been tested and verified by the Royal Mail and are certified to be used for all variants of the MailSort 120 (OCR & CBC), 700, 1400 and WalkSort bulk mail discount services. Certification by the Royal Mail of CleanMail On Demand is not required.

System Requirements

MailSort, WalkSort and CleanMail On Demand require the following minimum PC system:

- Microsoft Windows NT, 2000, 2003 or XP.
- Pentium IV CPU.
- 512 MB RAM.
- 10 GB spare hard drive space.
- CD-ROM drive.
