

SilentPrint

Batch Print & Batch Convert to PDF

Automatically batch print and batch convert to PDF a wide range of Windows documents including PDF, DOC, XLS, HTM, JPG, BMP and TIF.

ANYONE that regularly prints large batches of electronic documents or converts them to PDF will appreciate how time consuming and frustrating it is having to load each one into its respective application and then repeatedly having to hit the print or convert to PDF button to output or convert each and every document.

Wouldn't it be simpler if you were able to select all the supported documents that require printing or converting (whatever their format and however many) and automatically output them to the desired destination or convert them to PDF in just one simple step?

SilentPrint is the application that can do this!

How SilentPrint Works

SilentPrint works as follows:

- Standard Microsoft Windows folders (directories) are associated with any local or networked printer driver. These folders, known as Watched Folders, are continuously monitored by SilentPrint.
- Documents or shortcuts to documents that require printing or converting to PDF are manually copied to the Watched Folder that corresponds with where they need to be output. SilentPrint then automatically and invisibly opens the application(s) used to process the documents before 'silently' printing or converting them.
- Alternatively, simple text based files called Job files can be created that list the location and name of the documents that require printing

or converting. These, instead of the documents themselves, are manually copied to the required Watched Folder. SilentPrint reads their content and automatically and invisibly opens the application(s) used to process the listed documents before 'silently' printing or converting them.

Copy or cut the documents that you want printed or converted to PDF

Paste to a Watched Folder

You can place any number of documents within a Watched Folder or define as many as you like within a Job File and all are output or converted to PDF 'silently' without any further intervention from yourself – no manual opening of an associated application and no more repeated clicking of a print or convert to PDF button to process each document!

All you see is the SilentPrint icon in your Windows Taskbar Tray!

Supported Documents

* SilentPrint can process the following documents:

- BMP - Bitmap.
- DOC - Word.
- GIF - Graphic Interchange Format.
- HTM - Hypertext Mark-up Language.
- JPG - Joint Photographic Experts Group.
- MSG - Message Format (SilentPrint Server).
- PCX - Graphic format.
- PDF - Portable Document Format.
- PPT - Microsoft PowerPoint.
- PRN - Printer Ready.
- PS - Postscript.
- RTF - Rich Text Format.
- TIF - Tagged Image Format.
- TXT - Text & Text raw.
- WPD - WordPerfect.
- XLS - Microsoft Excel.
- XML/XSLT - Extensible Mark-up Language (SilentPrint Server).
- ZIP - Compressed File (processes supported files held within) (SilentPrint Server).
- ? - Any file that can be processed as a TXT document (i.e. BAT, INI).

30-Day Trial

A fully functional 30-day trial version of SilentPrint is available from the following FunAsset website:

silentprint.com

Alternatively you can request a CD using the contact details below.

System Requirements

In order for SilentPrint to operate you will require a PC running Microsoft Windows 2000, 2003, XP or Vista.

To successfully process the supported documents, the following applications or printer drivers will need to be installed:

- Adobe Reader or Acrobat 4.0 or above (PDF).
- Adobe PDF Writer or PDF Driver (batch convert to PDF).
- Corel WordPerfect 10 or above (WPD).
- Microsoft Excel 97 or above (XLS).
- Microsoft Internet Explorer (HTM, XML/XSLT).
- Microsoft Outlook (MSG).
- Microsoft PowerPoint 97 or above (PPT).
- Microsoft Word 97 or above (DOC, TXT, RTF).
- WinZip (ZIP).
- BMP, GIF, JPG, TIF and TXT image processing is performed by SilentPrint.
- PCL, PRN, PS and TXT raw documents are processed by the printer and cannot be converted to PDF.
